

Global Open Science Cloud (GOSC) Project

- Five-year Chinese Academy of Science (CAS) Funded Project.
- Led by CNIC-CAS (Computer Network Information Center), one of the foci for CODATA cooperation in China.
- Important early project as part of ISC CODATA Decadal Programme 'Making Data Work for Cross-Domain Grand Challenges'.
- Project outcomes: agreements on cooperation and technical / policy alignment between Open Science platforms.
- Project outputs: framework agreements on data policies, data standards and interoperability, infrastructure alignment, shared and core resources.
- International Conference on Open Science Clouds, late 2021.
- Preparatory workshops in 2021.
- Project was a result of workshops at CODATA 2019 Beijing.
- CODATA Working Group preparing DRAFT Project Plan, in collaboration with CNIC and will then be shared with stakeholders for input.
