

**Co-creating EOSC Webinars:
Fighting COVID-19 with Open Science**

13 April 2021
11:00-12:30 CEST

Agenda - 11:00-12:30 CEST

Chair: Bernd Saurugger (TU Wien)

- 11:00-11:05 Introduction - Bernd Saurugger (TU Wien)
- 11:05-11:20 AI4COVID: Artificial Intelligence and Geographical Information for Monitoring and Prediction of Covid-19 Outbreak - Jamal Jokar Arsanjani (Aalborg University Copenhagen)
- 11:20-11:35 A Dataset of Media Releases from Poland Related to COVID-19 for Open Research - Andrzej Jarynowski (Interdisciplinary Research Institute Co-founder)
- 11:35-11:50 Automaise EOSC COVID-19 Digital Assistant - Ernesto Pedrosa (Automaise Co-founder and CEO)
- 11:50-12:05 Up-to-date mapping of COVID-19 treatment and vaccine development - Ivana Mišová (Researcher, AIM)
- 12:05-12:25 Round Table Discussion
- 12:25-12:30 Q&A from Audience

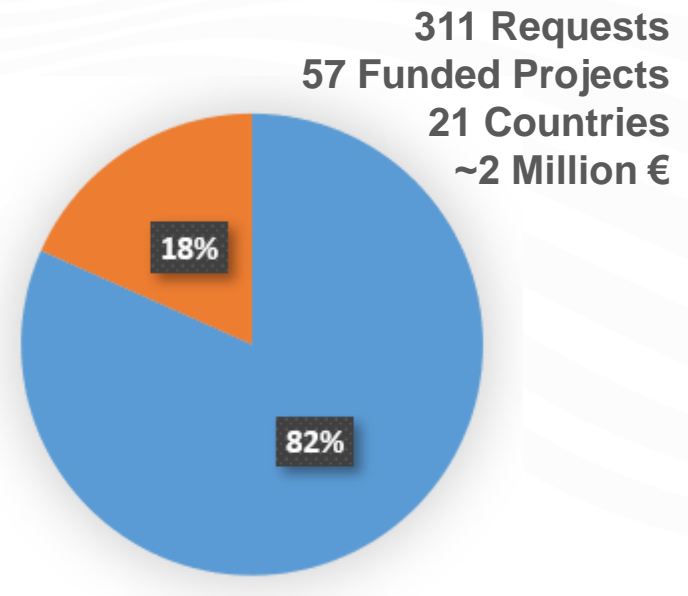

Scope of the Call:

- Opening up virus related research and data
- Sharing of infrastructures and services
- Developing open design equipment for fighting COVID-19
- Sharing sampling test methodologies and data
- Developing open methodologies, services, software and infrastructures for sharing data, practices and knowledge in relation to the development and treatment of COVID-19
- Developing open science methodologies for monitoring the spread of COVID-19
- Developing open-science / evidence-based methodologies for the development of epidemic combating policies
- Accessing and combining open data not only to eradicate the virus but learn how to deal with similar viruses and future outbreaks
- Assessing the validity of epidemic information in relation to the virus by ensuring that its sources can be traced and verified
- Other open science activities/ actions related to the fighting of epidemics and pandemics

Evaluation Criteria:

- Credibility
- Duration of the project
- Originality
- Power of reuse
